PRELIMINARY AMENDMENT

A response to the pending Notice Of Incomplete Nonprovisional Application (mailed August 10, 2004) is filed concurrently herewith.

Please amend the above-identified application as follows:

IN THE SPECIFICATION

Pursuant to 37 CFR 1.121(b)(3), the following is an instruction to replace the specification with a substitute specification that is deemed to comply with 37 CFR 1.121(b) and 121(c). In particular, a substitute specification is submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The undersigned has attempted to comply with the requirements of the rule, however, it should be appreciated that the rule does not address the precise situation here, namely, the inclusion of embedded drawings that are desired to be omitted from the substitute specification. The undersigned has attempted to use a "strike-through" as required by the rule. An accompanying clean version (without markings) is also supplied for substitution into the record.

IN THE DRAWINGS

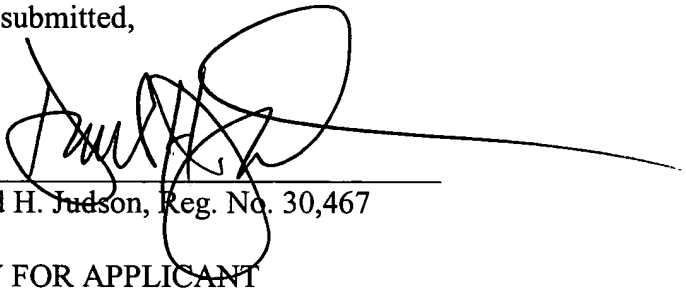

The application was deemed filed without drawings. The drawings were embedded in the original specification. They are removed in the substitute specification.

As the drawings are no longer present in the substitute specification, the Office is requested to amend the above-identified application to include the drawings that are appended to this Preliminary Amendment. No new matter is included, as the text of the specification clearly supports the subject matter set forth in the newly submitted drawings.

As these are not replacement or amended drawings, the undersigned has not included any specific instructions as to replacement sheets as contemplated by 37 CFR 1.121(d). If additional instructions are needed to place these new drawings into the record formally, the Office is requested to contact the undersigned.

Respectfully submitted,

By:

David H. Judson, Reg. No. 30,467
